

Q: 开篇问: Have you been strictly following any of the process models? Why not?

A: 希望引导出对按部就班的过程的不满, 从而导出 agile 的概念。

Q: 讲到极限编程时, 问 2 个概念: How to compute project velocity? Why pair?

A: 只要计算平均单位时间完成的 user stories 就可以了; 配对编程方便随时纠错,

两个人可以互相看到对方的盲点。

Q: 讲到 Scrum 时, 问: In a 15-minute daily meeting, what would you do?

A: 参考 scrum 的 3 个问题

1. What did you do since last Scrum meeting?
2. Do you have any obstacles?
3. What will you do before next meeting?
