

选择题

- 1) What are not the elements that are present in every computer-based system?
(A) people (B) software (C) product (D) documentation (E) project
- 2) Which factors are important when choosing a project team leader?
(A) managerial identity (B) ability of communicating to other people
(C) problem solving ability (D) outstanding programming ability
- 3) Which of these are valid software configuration items?
(A) case tools (B) executable programs (C) test data (D) documentation
- 4) Which factors are important when choosing a project team leader? _____
(A) managerial identity (B) outstanding programming ability
(C) problem solving ability (D) ability of communicating to other people
- 5) How does a software project manager need to act to minimize the risk of software failure?
A) double the project team size
B) request a large budget
C) start on the right foot
D) track progress
- 9) Which of the following tasks are part of software configuration management?
A) change control
B) statistical quality control
C) reporting
D) version control

判断题

- 1) 维护软件文档与维护可执行代码同等重要。 ()
- 2) Sales people is a key player in the software process. ()
- 3) Project management is less important for modern software development since most projects are successful and completed on time.
- 4) Software configuration includes all information produced as part of the software process, such as programs, documents, data, and possibly some developing tools.
- 5) A good software is flexible, so it can easily accommodate changes brought up with the requirement change.
- 6) Once a software engineering work product becomes a baseline it can not be changed again.
- 7) CD and CC team structure can be successfully applied to simple problems, but DD structure is best for difficult problems.
- 8) Customers, end-users, practitioners, project managers and sales people are all considered as players in the software process.
- 9) A stakeholder is anyone who will purchase the completed software system under development.
- 10) The best person to hire as a project team leader is the most competent software engineering practitioner available.

11) Once a software engineering work product becomes a baseline it can not be changed again.

12)

论述题

拟开发一个机票预订系统 ZDBKG。该系统有如下需求：“旅行社把预订机票的旅客信息（姓名、性别、工作单位、身份证号码、旅行时间、旅行目的地等）输入系统，系统为旅客安排航班，打印出取票通知和帐单，旅客在飞机起飞的前一天凭取票通知和帐单交款取票，系统校对无误即印出机票给旅客。”所开发的系统要求在网络平台上运行。下面两套题目中，请你**任选一套**完成。请圈出你的选择：**A B**

A

B

1. 请你列出软件开发过程中的文档清单。（5 分）
